

How-to Turn on iPad Accessibility Features

Setting up Accessibility Shortcut

- This will enable you to be able to triple-click the home button to turn on VoiceOver, Zoom, and Magnifier.

Open **Settings**

Go to **General** → **Accessibility**

Scroll to the bottom and click **Accessibility Shortcut**

Now tap on each Accessibility Feature that you would like to use:

- Assistive Touch
- Classic Invert Colors
- Color Filters
- Reduce White Points
- Smart Invert Colors
- Switch Control
- **VoiceOver**
- **Zoom**

I have bolded VoiceOver and Zoom because they are two out of the three Accessibility features we will be focusing on. The third feature is **Magnifier**, which will be added to our Accessibility Shortcut through a different menu.

Adding Magnifier to Accessibility Shortcut

Open **Settings**

Go to **General** → **Accessibility** → **Magnifier**

Click the **Toggle Switch** next to Magnifier to turn it on. This will place it in the Accessibility Shortcut (Triple-Click Home)
