

How-to use Zoom on iPad

Turn on Zoom

To begin turn on Zoom using the Accessibility Shortcut (if configured), by telling Siri, or by going to: Settings → General → Accessibility → Zoom → Toggle On

How-to Use Zoom

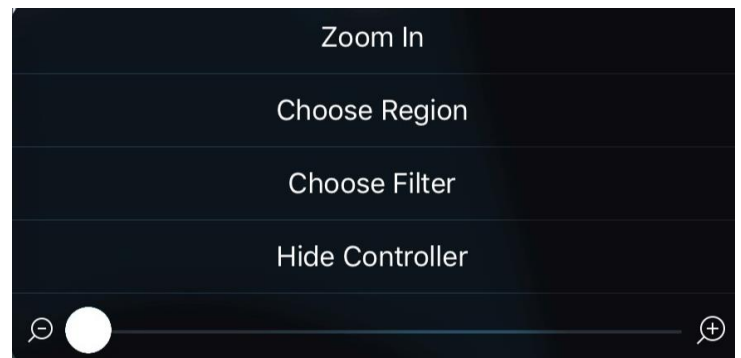

Double-tap three fingers to Zoom (toggle)

Drag three fingers to move around the screen

Double-tap three fingers and drag to change zoom

Triple-tap three fingers to open Zoom menu

- Zoom in/out
- Choose Region
 - o Full Screen Zoom
 - o Window Zoom
- Choose Filter
 - o None
 - o Inverted
 - o Grayscale
 - o Grayscale Inverted
 - o Low Light
- Show/Hide Controller
- A bar to choose Zoom level

Controller

The Controller is a button that will stay on the screen (if enabled). If clicked, it will pull up the Zoom menu, without having to Triple-click three fingers.

You can also use the controller as a joystick to move around your Zoomed-in view. (Same as dragging three fingers).
